Re: Tech Support Engineer, AVEVA

Dear AVEVA Hiring Team,

I am applying for the Tech Support Engineer role in Calgary. I combine product support experience with an engineering background in networks, and I am comfortable working with R&D and project teams to resolve complex customer issues.

As product owner I gathered requirements, ran testing and kept technical documentation accurate; as a network engineer I worked on fibre projects and handled urgent faults. I have travelled internationally for training and project work, including to India and Rwanda, and I communicate clearly with customers under pressure.

I am legally entitled to work in Canada, live in Calgary, and can start with two weeks' notice. I would welcome the chance to talk about how I can help your team. My portfolio is at citizensadi.com.

Sincerely,

Sadisu Hassan
