Re: Technical Support Representative, Canadian Fiber Optics

Dear Canadian Fiber Optics Hiring Team,

I am applying for the Technical Support Representative role. Few support candidates have built fibre networks; I have. At Tech Centrum I planned and supervised optical fibre projects, including metro fibre builds, and responded to network faults at any hour. Before that, at iBurst, an internet service provider, I provided level 2/3 support to residential and business customers by phone and on site.

Your posting focuses on troubleshooting internet, Wi-Fi and connectivity issues and escalating the hard ones cleanly. That is the work I did at iBurst every day, including installing customer equipment and logging every case in the ticketing system. I hold CompTIA A+ and Google IT Support certifications and completed full CCNA training, and I stay calm and clear with frustrated customers.

I am legally entitled to work in Canada, live in Calgary, and can start with two weeks' notice. I would welcome the chance to talk about how I can help your team. My portfolio is at citizensadi.com.

Sincerely,

Sadisu Hassan
