Re: Technical Support Specialist, Elation Health

Dear Elation Health Hiring Team,

I am applying for the Technical Support Specialist role. Supporting clinics that rely on your platform appeals to me: I currently work in Alberta Health Services hospitals and have spent years in technical and product support.

Your posting asks for customer-facing communication, pattern recognition, and a portfolio of things I have built. As product owner at Paid Global and Hexagram I spotted patterns in user reports and turned them into fixes with engineering. On one ticketing app launch I traced why buyers from an Instagram link were charged but not sent tickets, sent their tickets manually, and worked with engineers to fix the cause. My portfolio site, citizensadi.com, is something I maintain and deploy myself.

I am legally entitled to work in Canada, live in Calgary, and can start with two weeks' notice. I would welcome the chance to talk about how I can help your team. My portfolio is at citizensadi.com.

Sincerely,

Sadisu Hassan
