Re: Application Customer Support Analyst, Enverus

Dear Enverus Hiring Team,

I am applying for the Application Customer Support Analyst role. I have spent my career helping people get software and systems working, most recently as the operations lead and product owner for a mobile app at Paid Global, and before that as product owner and IT systems administrator at Hexagram. Supporting a data platform used by energy professionals in Calgary is exactly the kind of work I want to do next.

Your posting asks for someone who troubleshoots with empathy, writes clearly and keeps several inquiries moving at once. At iBurst I handled a steady stream of level 2/3 support cases, logging and tracking each one through to resolution. As a product owner I ran user acceptance testing, reproduced issues users reported, and worked with developers in Canada and Pakistan to fix them. A First Class Honours degree in Communication Studies means I can explain a fix so the client understands it the first time.

I am legally entitled to work in Canada, live in Calgary, and can start with two weeks' notice. I would welcome the chance to talk about how I can help your team. My portfolio is at citizensadi.com.

Sincerely,

Sadisu Hassan
