Re: Desktop Support Engineer, Tata Consultancy Services

Dear Tata Consultancy Services Hiring Team,

I am applying for the Desktop Support Engineer role supporting the Qualys patch management proof of concept. I have supported Windows workstations and office systems in several roles and I am careful about testing and documentation.

As a product owner I ran structured user acceptance testing and recorded findings for engineering, which maps well to validating patches on endpoints and reporting results. As IT systems administrator at Hexagram I supported Windows machines, SaaS platforms and the office network. I am CompTIA A+ and Google IT Support certified and learn new tools quickly.

I am legally entitled to work in Canada, live in Calgary, and can start with two weeks' notice. I would welcome the chance to talk about how I can help your team. My portfolio is at citizensadi.com.

Sincerely,

Sadisu Hassan
